THE COUNCIL.

The Council, the governing body of the College, consists of twenty-four Members, three* of whom go out in rotation annually in July, but are eligible for re-election by the Fellows of the College. All proceedings of the Court of Examiners, the Board of Examiners in Anatomy and Physiology, the Dental Board, and the several Committees are reported to the Council for approval and confirmation. The Meetings of the Council are generally held in each month of the year, except in the month of September, and at such other times as the business of the College may require.

* If in any year one of the three retiring Members be President of the College, he does not go out of office until the succeeding year.

THE COURT OF EXAMINERS.

The Court of Examiners consists of ten Members elected by the Council from the Fellows of the College. The Court conducts the Pass Examinations in Surgery and Surgical Anatomy of Candidates for the Diplomas of Fellow and Member of the College.

THE BOARD OF EXAMINERS IN ANATOMY AND PHYSIOLOGY FOR THE FELLOWSHIP.

The Board consists of eight Members annually elected by the Council. The Board conducts the Primary Examinations in Anatomy and Physiology for the Diploma of Fellow.

THE EXAMINERS UNDER THE CONJOINT EXAMINING BOARD IN ENGLAND.

The following Examiners are elected annually by the Council under the Examining Board in England by the Royal College of Physicians of London and the Royal College of Surgeons of England, viz. :—

FIRST EXAMINATION.—Four Examiners in Elementary Biology.

SECOND EXAMINATION.—Four Examiners in Anatomy and three Examiners in Physiology.

THIRD EXAMINATION.—Four Examiners in Midwifery.

EXAMINATION IN PUBLIC HEALTH.—Two Examiners.

BOARD OF EXAMINERS IN DENTAL SURGERY.

The Board consists of eight Members elected by the Council for five years, viz. :— four Members of the Court of Examiners of the College, and four other persons duly registered under “The Dentists’ Act, 1878.” The Board conducts the Examination of Candidates for the Diploma in Dental Surgery of the College.

The Preliminary Science Examination, which has to be passed by Candidates who registered as Dental Students on or after the 1st January 1897, is identical with Part I. of the First Examination of the Conjoint Examining Board in England, and is conducted by the Examiners appointed under that Board.

RETURNS OF THE RESULTS OF THE SEVERAL EXAMINATIONS.

The following is a statement of the number of Candidates who presented themselves for the Fellowship, for the First, Second, and Third Examinations and the Examination in Public Health of the Conjoint Examining Board, and for the Diploma in Dental Surgery respectively, with the results of the several Examinations, viz. :—

I. Annual Meeting of Fellows and Members.

This Meeting was held on Thursday, the 19th November, 1903, at 3 o'clock P.M.

The Chair was taken by the President, Mr. John Tweedy. Twelve Fellows, including 9 Members of the Council, and 43 Members attended the Meeting.

The President placed before the Meeting the Report of the Council for the period from the 1st August 1902 to the 4th August, 1903, and called attention to some of the more important matters which had come under the consideration of the Council during the year. A vote of thanks was thereupon accorded the Council for

the Report on the motion of Surg.-Major Ince and Mr. Nelson Hardy.

The President also stated that copies of the Report had been circulated to 593 Fellows and 3,187 Members.

The following resolutions were carried at the Meeting, viz.:—

I. Moved by Dr. Thomas Morton, M.R.C.S., seconded by Mr. Dennis Vinrace, M.R.C.S., and carried *nem. con.*:—

That this Meeting once more affirms the claims of the Members to representation on the Council on grounds of historical right, justice, and expediency.

II. Moved by Mr. Joseph Smith, M.R.C.S., seconded by Dr. G. Danford Thomas, M.R.C.S., and carried *nem. con.*:—

That the Council is respectfully requested to receive a deputation of Members to confer on the subject of the foregoing Resolution.

The following Motion was proposed by Dr. W. G. Dickinson, M.R.C.S., and seconded by Mr. Brindley James, M.R.C.S., viz.:—

That this Meeting regrets the inadequate information given to Fellows and Members regarding the proceedings of the Council, and is of opinion that the complete Minutes of the Council meetings should be accessible to any Member of the Corporation at reasonable hours.

After an explanation given by the President, this motion was withdrawn with the consent of the Meeting.

The following Resolution moved by Mr. H. Nelson Hardy, M.R.C.S. (in the absence of Mr. George Brown), and seconded by Mr. J. C. Smith, M.R.C.S., was lost, 8 voting for and 9 against the same, viz.:—

That this Meeting considers it unfortunate that the Council should have placed before it their reply to a Report from the Inspectors of the General Medical Council without publishing at the same time the Report itself, and further trusts that the Council will take immediate steps to bring the dispute with the General Medical Council to an amicable settlement.

Sympathetic allusion having been made at the close of the Meeting to the death, on the 15th November, of Sir Robert M. Craven, F.R.C.S., for many years a regular attendant at the Annual Meeting, the President undertook to convey the sympathy of the Meeting to Sir Robert's family.

A letter has since been received from the family expressing their heartfelt thanks for the sympathy shown to them in their bereavement.

In regard to the two Motions carried at the Meeting the Council adopted the following Resolutions, viz. :—

I. That, in the opinion of the Council, it is not expedient to re-open the question of the representation of Members of the College on the Council.

II. The Council, being of opinion that it is not expedient to re-open the question of the representation of Members of the College on the Council, consider that no useful purpose would be served by receiving a deputation of Members to confer on the subject.

With reference to the Motion proposed by Dr. Dickinson and afterwards withdrawn, it has been determined to post the Minutes of Council in the Library and Common Room as well as in the Hall of the College.

II. First Examination of the Conjoint Examining Board.

Before the completion of the arrangements for alterations in the Regulations of the Conjoint Examining Board relating to the First Year of Study and First Examination, a letter was received from the General Medical Council inviting the two Colleges to a conference upon the various questions which had been raised in the Reports of the Education and Examination Committees of that Council.

To this invitation it was determined, after a consultation between the two Colleges, to send the following reply, viz. :—

The Royal Colleges thank the General Medical Council for the expression of their opinion respecting the courses of study and the examinations in Chemistry, Physics, and Biology. These opinions shall receive the respectful attention of the two Royal Colleges.

The Royal Colleges, however, regret that they are unable to accept the invitation of the President of the General Medical Council to appoint Representatives to meet the Representatives of the General Medical Council in regard to the questions of Medical Education and Examination relating to the subjects above mentioned that have been raised in the Reports of the Education and Examination Committees of the General Medical Council.

The two Colleges thereupon, in pursuance of their original intention, proceeded to ascertain the opinion of the Teachers in the English Medical Schools and of the past and present Examiners on the alterations desirable in the Synopses of Chemistry, Physics, and Biology, and in the mode of conducting the Examination in those subjects.

Several meetings were held by the Teachers and Examiners in Chemistry and Physics to consider the matter, and in accordance with their recommendation it was determined to institute a separate Examination in Physics, and the Synopsis prepared by them was adopted with a few modifications. With regard, however, to the Synopsis of Chemistry there appeared an important difference of opinion. A Synopsis of Theoretical and Practical Chemistry was drawn up and recommended by a considerable number of the Teachers of Chemistry, whilst other Teachers suggested another totally different Synopsis, particularly in regard to the Practical Examination, based on the principle of allowing the use of books and tables during that part of the Examination. The alternative schemes were fully considered, and, a satisfactory Synopsis of Practical Chemistry having been prepared after further consultations, it was finally decided to adopt the proposal to allow the use of books, on the ground that it would enable the Student to study more thoroughly the principles of Chemistry without occupying too much time in committing to memory mere routine methods of analysis.

The Teachers of Biology held two meetings, and, while expressing the opinion that the existing Synopsis was as a whole satisfactory, recommended a few additions and suggested the desirability of defining the scope and objects of the *viva voce* part of the Examination.

The following revised scheme for the First Year of Study and the First Examination of the Conjoint Examining Board was accordingly adopted, viz. :—

INSTRUCTION.

1. A minimum course of study shall be required in Chemistry, Physics, and Biology, before Candidates are admitted to Examination in these subjects.

2. The minimum course in the several subjects shall be :

In Chemistry 180 hours' Instruction and Laboratory work.				
In Physics	120	"	"	"
In Biology	120	"	"	"

3. These courses need not run concurrently, nor be completed within one year.

4. These courses may be commenced or attended before the required preliminary examination in general education is passed.

5. Study at an Institution other than a recognized Medical School shall be counted for not more than six months of the Curriculum.

6. The study of Anatomy and Physiology shall be not recognized until after the First Examination in Chemistry, Physics, and Biology has been passed.

7. No student shall be admitted to examination in Medicine and Surgery until he has completed five years of professional study after passing the Preliminary Examination in general education, towards which six months' study at a recognized Institution may be counted, if taken subsequently to passing such preliminary examination.

EXAMINATION.

Chemistry (Part I.), Physics (Part II.), Biology (Part III.), and, at the option of the Candidate, Practical Pharmacy (Part IV.) shall be the subjects of the First Examination.

CHEMISTRY.

The paper in Chemistry shall consist of nine questions, six to be answered and no more, for which three hours shall be allotted.

The time for the Practical Examination shall be extended from 2 to 3 hours.

The use of books and tables shall be allowed in the Practical Examination.

PHYSICS.

There shall be a separate paper in Physics consisting of six questions, four to be answered and no more, for which two hours shall be allotted.

There shall be a *viva voce* Examination on the use of Physical Instruments.

Candidates shall be required to pass in both Chemistry and Physics at one and the same time; the marks awarded in Chemistry and Physics shall be considered together; and Candidates who obtain 40 per cent. of the total of the two subjects shall pass, provided that they obtain not less than 20 per cent. in either subject.

BIOLOGY.

In addition to the *viva voce* Examination, there shall be a paper in Biology, for which 2 hours shall be allotted, consisting of six questions, four to be answered and no more.

Each Candidate shall be examined orally for 15 minutes.

These alterations, which will take effect from March 1905, have been communicated to the General Medical Council.

A letter was subsequently received from the Registrar of the General Medical Council reporting Resolutions adopted by that Council on May 27th, 1904, in regard to Preliminary Scientific Education and Examination after the receipt of a Report of a Special Committee of the Council which had been appointed to consider the

subject and ascertain the views of the several Licensing Bodies. It was found that these Resolutions did not recommend anything which was not already included in the revised Regulations of the Conjoint Board.

III. Third Examination of the Conjoint Examining Board.

The Third Examination of the Board was inspected, on behalf of the General Medical Council, by Sir Charles Ball and Sir George Duffey in January 1903.

Their Report, having been submitted to the General Medical Council, was forwarded to this College, in order that the Council of the College might be afforded the opportunity of offering comments thereon, should they desire to do so.

The Court of Examiners were accordingly requested to take the Report into consideration so far as it related to the Surgical part of the Examination, and they submitted the following Report, which was adopted by the Council of the College as their reply to the criticisms of the Visitor and Inspector of the General Medical Council, viz. :—

REPORT, dated the 27th November, 1903, of the
COURT OF EXAMINERS.

Members of the Court.

MR. HENRY MORRIS, Vice-President, *Chairman.*

MR. C. H. GOLDING-BIRD.

MR. G. H. MAKINS, C.B.

MR. A. PEARCE GOULD.

MR. FREDERIC EVE.

MR. BERNARD PITTS.

MR. W. WATSON CHEYNE, C.B.

MR. W. H. A. JACOBSON.

MR. CLINTON T. DENT.

MR. WILLIAM F. HASLAM.

THE Court have carefully considered the Report of the Visitor and Inspector of the General Medical Council on the Third or Final Examination of the Conjoint Examining Board in England, so far as it relates to the Surgical portion of the Examination, and in particular have directed their attention to the following comments, viz. :—

“ We regret to observe that the recommendation made in the last *Report* that, in addition to the Oral Examinations, Candidates should be required to furnish a written report of at least one Medical as well as one Surgical case has not been adopted.

“ The time formerly allowed for the Clinical Examination in Surgery has also very properly been extended from fifteen to thirty minutes, and the Examination now is as good a one of its kind as could be desired. The objectionable system of marking, however, described in the last *Report* has not been altered.

“Consequently the remarks made thereon, to which we beg to refer, still apply.

“In Surgery there is still no special Examination in Ophthalmic or Aural Surgery. There could be no difficulty, we should think, in providing an ample supply of suitable cases for such an examination, and we are of opinion that no one should be granted admission to the *Medical Register* who did not give evidence by examination of having had adequate ophthalmoscopic training, and who could not show, at least, that he was able to delineate the vessels on the fundus oculi.

“Although a Candidate is required to present a certificate of having himself performed operations upon the dead subject to the satisfaction of his teacher, no Examination in Operative Surgery on the Cadaver is held. The reason assigned in answer to the criticism made on the omission of this Examination in the last *Report*, was the difficulty in obtaining a sufficient supply of subjects in London. In lieu of such an Examination, Candidates are required to indicate with a coloured pencil upon the living model the lines of external incisions of various operations, and to go through a pantomime with dummy knives made of wood—a form of Examination which we cannot describe otherwise than as puerile.

“The evil of the system of marking pursued at the Examinations of the Conjoint Board, and which was condemned in the last *Report*, was forcibly brought before us in connection with the Oral Examinations in Surgery. The maximum mark for this Examination at each of two tables is 5, and the minimum is 1, no fractions being used. Should a Candidate in the opinion of the Examiners deserve anything more than one whole number up to 5, he is given the benefit of the fraction, and awarded the next number above. And, as the pass mark is 50 per cent., it follows that a Candidate who in the opinion of the Examiners just qualifies to pass, must receive 3, or 60 per cent. As an example of how this works out, we may take the case of a Candidate who at one table had a case of sarcoma and another of lupus, upon neither of which did he answer well. The Examiners expressed the opinion that he ought not to receive a pass mark (a view in which we fully concurred). He accordingly was awarded 2. At the next table he answered a little better, and the Examiners expressed the opinion that he just deserved a pass mark. He was consequently awarded 3, making 50 per cent. for the two tables. This Candidate passed.

“We are strongly of opinion that the maximum marks awarded at any portion of an Examination should not be less than 10.”

CONCLUSION.

“We are of opinion that the Final Examinations in Medicine, Surgery, and in Midwifery by the Conjoint Examining Board in England are ‘sufficient.’”

The Court of Examiners beg to make the following Report to the Council :—

1. In regard to the recommendation that, in addition to the Oral Clinical Examination, Candidates should be required to furnish a written report on at least one Surgical case,—

The Court do not agree with this recommendation. They have had considerable experience of this form of examination in the Final Examination for the Fellowship, and so unsatisfactory has it, in their opinion, proved, that the two written reports on Surgical cases which used to be required have been reduced to one, and the advisability of discontinuing the single written report has been seriously considered. The *viva voce* Clinical Examination appears to the Court to be much the better test of a Candidate's knowledge, and quite sufficient for the purpose, especially as for the last six years the time devoted to the Examination has been extended from 15 minutes to half-an-hour.

Moreover, the Court are of opinion that this recommendation is impracticable, owing to the great number of patients that would be required and the time which would be occupied in the examination of the large number of Candidates presenting themselves. (During the year ending the 24th of June last, 766 Candidates were examined in Surgery at the Final Examination of the Conjoint Board.)

2. With reference to the criticism that "there is still no special examination in Ophthalmic Surgery or Aural Surgery,"—

The Court would remind the Council that the question of instituting a special examination in Ophthalmic Surgery was very fully considered in the year 1890 and again in 1895, when a circular upon the subject was addressed to the Medical Schools in England. Out of the eighteen Schools consulted only three were found to be in favour of a special examination, and the Court, in a Report dated the 25th of May, 1895, gave their reasons for considering a separate examination undesirable. The present Court, which, with one exception, consists of Examiners appointed since that date, entirely agree with the views then recorded.

In that Report the opinion was expressed "that at the present time Candidates are adequately examined in Ophthalmic Surgery and that a separate Examination in this subject is undesirable":—

and further that "if the principle be admitted that a special Pass Examination is to be required in Ophthalmic Surgery, it may soon be considered necessary to appoint special Examiners in other branches of Surgery, such as Laryngology, Otology, Dermatology, and Orthopædics."

The Court would also point out that by Clause 8, paragraph II. Section I. of the Regulations, Candidates are required to produce a certificate

"Of having attended Clinical Instruction in Ophthalmic

Surgery at an Ophthalmic Hospital recognized for the purpose by the Examining Board in England, or in the Special Ophthalmic department of a recognized General Hospital during not less than three months ; ”

All Candidates, moreover, are liable to be examined in Ophthalmic and in Aural Surgery, as well as in any other branch of Surgery, and the Court consider that a special Examination in either subject is unnecessary and undesirable.

3. With regard to the statement that “ no examination in Operative Surgery on the cadaver is held,”—

The Court do not agree with the remarks of the Visitor and Inspector in the views they have stated on the present mode of examination in Operative Surgery. In the opinion of the Court, a very good test of the Candidate's knowledge is obtained by calling upon him to explain on the living model how he would perform an operation, to select and describe the instruments he would use, and to undergo examination as to the structures involved in such operation.

The Court do not consider it desirable that Candidates at the Final Examination of the Conjoint Board should be examined in Operative Surgery on the cadaver. Such an examination is at the best an uncertain test of a Candidate's dexterity, and with numerous Candidates and a scarcity of subjects, it would be most difficult to maintain a uniform standard, because some would have to perform operations of an easy and others those of a difficult nature.

The question of the supply of subjects has also to be considered. As was pointed out to the Visitor and Inspector, the impossibility of obtaining a larger supply of subjects in London than that now available renders it impracticable to examine large numbers of Candidates in operations on the cadaver without seriously diminishing the supply of subjects for dissection and for the courses of Operative Surgery which all Candidates are required to attend.

4. The Scheme of Marks.

The Court are of opinion that some modification may be desirable, and it is proposed that the following scheme of marks be tried. This scheme will enable a pass mark to be given in each part of the Examination : at the same time, higher marks will be attached to the longer Clinical Examination. The pass standard will be 50 per cent. as at present.

	Surgical		Pathology		
	Clinical.	Anatomy.	Table No. 1.	Table No. 2.	Paper. Total.
Maximum .	12	10	10	10	18 : 60
Pass Mark .	6	5	5	5	9 : 30
Minimum..	3	2	2	2	4

Candidates who obtain not less than 30 marks (50 per cent.), provided they do not obtain less than the minimum at any one part, will be adjudged to have passed the Examination.

IV. Success of London Diplomates at Service Examinations.

An interesting communication has been received from Mr. F. W. Collingwood, M.R.C.S., containing statistics relating to the examinations in 1903 for admission to the Navy, Army, and Indian Medical Services, showing that candidates holding the L.R.C.P.Lond. and M.R.C.S.Eng. were: (a) 22·6 per cent. more successful than candidates drawn from all other sources; (b) 28 per cent. more successful than the candidates holding degrees and diplomas from Scotch and Irish Universities and Colleges; (c) 23·5 per cent. more successful than the Scotch and Irish Graduates; (d) 15·8 per cent. more successful than the Edinburgh Graduates; and (e) 34·3 per cent. more successful than the Dublin Graduates.

Mr. Collingwood also called attention to the following return relating to the same Examinations during the years 1893 to 1902, compiled by Mr. Thomas Bryant and communicated by him to the General Medical Council in May 1903, viz. :—

V. Registers of Medical and Dental Students.

The following Report was submitted by Mr. Henry Morris, the Representative of the College in the General Medical Council, regarding the proposal of that Body to seek statutory powers to institute Registers of Medical and Dental Students, viz. :—

"On Monday, May 30th, the following resolution, primarily having the object of increasing the revenue of the General Medical Council, was moved by Sir John Batty Tuke, M.P., and seconded by Sir Victor Horsley, and was carried by twenty-two votes against six :—

'That the Lord President of the Privy Council be requested to introduce into Parliament a Bill to confer upon the General Medical Council statutory powers to establish and maintain *Registers of Medical and Dental Students*, and to impose a fee not exceeding £1 for registration therein.'

"As it was specially stated by the mover that the power of laying down the conditions of registration would be an absolute *sequitur* to the power to register students, it is obvious that if the statutory powers asked for by the General Medical Council are granted by Parliament the two English Royal Colleges are likely to be deprived of the Chartered rights and powers they at present possess, and for which they have been contending in the late correspondence with the General Council."

The Council of the College, upon the receipt of this report from Mr. Morris, having authorised the President and Vice-Presidents to take such action as they might think fit in approaching the Privy Council in reference to the matter, a communication was addressed to the Clerk of the Council and an assurance received that no action would be taken in the matter without affording the Medical Corporations and other bodies affected the fullest opportunity of expressing their views.

VI. Regulations for Licence in Dental Surgery.

The following Report from the Board of Examiners in Dental Surgery, recommending certain alterations in the Regulations, has been adopted by the Council, and the new conditions are to take effect from the 1st November, 1904 :—

"The Board of Examiners in Dental Surgery have had their attention drawn to a difficulty which has arisen under the new Regulations for the Licence in Dental Surgery.

Since the Regulations for the Licence in Dental Surgery were altered so as to permit candidates to take the General part separately from the Dental part, it has been found that a considerably larger number of men pass in the Dental section than in the General. The result of this is that at the present time there are many partially qualified men in the Schools besides others who are said to be carrying on illegal practice. An examination of the records shows that there are no less than 72 students who have passed in the Dental part only, having either failed in, or not presented themselves for, the General part of the Examination.

Attention has been called to the undesirability of these men, though not entitled to the Diploma, being able to describe themselves as qualified in the Dental subjects, and it has been suggested that steps should be taken to avoid this possibility in the future.

To this end it is proposed to alter the regulations so as to provide that if a candidate wishes to take the parts at different periods, he must pass in the General section before presenting himself for the Dental section, and if he elects to take both together, failure in the General section shall necessitate withdrawal, after the written paper and without admission to the Practical and Oral parts of the Dental section. This will not involve any hardship on the candidate, as by the Regulations he is entitled to present himself for Part I. at the expiration of two Winter sessions and one Summer session from the date of entering at his Medical School, whilst the Dental Section cannot be passed until after the completion of two years of study. Further, in the case of a candidate who takes both parts, there would not be any injustice in preventing him from completing the whole examination, if he is not called upon to pay any additional fees and if notice is given that his admission to the Practical and Oral Examination by the Dental Section will depend upon the result of his examination in the general subjects.

The Board of Examiners having carefully considered this question, have unanimously resolved to recommend the Council to adopt the following resolutions:—

1. That a candidate who elects to take the examination in two parts must present himself for, and pass in, the General section first.
 2. That a candidate who presents himself for the whole of the examination at the same time may pass in the General section though he may fail in the Dental section.
 3. That a candidate who presents himself for the whole Examination shall complete his examination in the General section before his dental paper is read by the Examiners, and before being admitted to the Dental Practical and Oral Examination, and, in the event of his failure in the General section, he shall not be allowed to proceed with the Dental section.
 4. That in the event of the compulsory withdrawal of a candidate from the Dental part of the Examination, the fee paid for admission to that part will not be forfeited by him, but will be held over until such time as he becomes eligible and presents himself to be examined by the Dental Section of the Board."

VII. Diplomas in Tropical Medicine.

The question of instituting an examination and diploma in Tropical Medicine and Hygiene is one to which much consideration has been devoted during the past year.

The attention of the Council was first called to the matter by a letter from the Secretary of State for the Colonies referring to the decision of the University of Cambridge to establish such an examination and diploma and suggesting the desirability of similar encouragement being given by the Royal College of Surgeons of England to the study of Tropical Medicine.

The Royal College of Physicians having also received a like communication from the Colonial Secretary, the question was referred for consideration to the joint Committee of Management of the two Colleges, who, while expressing opinions in many respects adverse to the proposal, nevertheless recommended that "after a sufficient period of observation of such Tropical Diseases, candidates should be admitted to an examination held by the Royal Colleges, and on passing it should receive a diploma in testimony of this addition to their professional experience."

The Report containing this recommendation was, however, not adopted by the Royal College of Physicians, and the Council of this College therefore appointed a Committee of their own to consider the question, and subsequently adopted the following Report which was in due course presented by the Committee, viz. :—

REPORT, dated the 2nd June, 1904, of the COMMITTEE ON DIPLOMAS IN TROPICAL MEDICINE.

The Committee, appointed by the Council on May 12th to consider the question of instituting an examination and diploma in Tropical Medicine and Hygiene, as suggested to this College and to the Royal College of Physicians by the Secretary of State for the Colonies, and to advise the Council as to what steps should be taken in view of the rejection by the Royal College of Physicians of the Report on the subject, dated the 20th April, 1904, from the Committee of Management, have held two meetings, and now beg to submit the following report :—

Possessing little information respecting the reasons which influenced the Royal College of Physicians in their decision, the Committee have deemed it proper to make an independent survey of the question raised by the letter of the Colonial Secretary, and they have arrived at a unanimous opinion that it is desirable to hold a special examination and grant a special diploma in Tropical Medicine, as has been done already in the case of Public Health.

Apart from purely professional considerations, the Committee think that the opinion of one of the principal Secretaries of State that the adoption by the Royal Colleges of the course suggested will help to "encourage the study of Tropical Medicine," and thus further "a matter of vital importance to the British tropical

colonies," should receive the most serious and thoughtful attention, and should not be rejected except for reasons of the most convincing character. The vast Colonial possessions and dependencies of the British Empire lying within the Tropics, the enormous native population, and the large number of British-born persons engaged in the government, the administration, the protection, and the trade of these possessions, make the study of Tropical Medicine and Hygiene a matter of Imperial importance.

Referring more particularly to the Report of the Committee of Management, this Committee would observe that, while approving of the recommendation to the two Colleges to institute a special examination and diploma, they are unable to endorse many of the statements and arguments set forth in the Report, the general tenour of which is indeed rather to show "the grounds on which, in the opinion of the Committee of Management, the Royal Colleges might have declined to institute a Diploma," than to adduce reasons in favour of the recommendation. As the Report has been rejected by the Royal College of Physicians, and as it may be considered for the present as in a state of suspension, the Committee have thought it relevant to the purpose for which they were appointed to offer some criticism of some of the preliminary statements made in the Report, more especially as it is not improbable that these statements may have had some influence in causing the rejection of the Report by the Royal College of Physicians.

Regarded as a general statement it is doubtless true that "the Diplomas of the Royal Colleges are complete testimony of the fitness of those holding them to practise every part of the Medical Profession," but in the present connexion the statement needs qualification. The Diplomas of the two Colleges do furnish high testimony to the training and knowledge of those who obtain them, but they are testimony of fitness to begin the practice of the profession of Medicine rather than proofs of proficiency in every department of Medicine, and especially in a department so highly differentiated as that of Tropical Medicine. Again, there may be no essential difference in kind between "the methods of observation and the principles of deduction from observation" of diseases in this Country and in the Tropics, but experience has clearly shown that the successful investigation of Tropical diseases necessitates considerable technical skill in chemical and microscopical manipulation, and presupposes much specialized knowledge of soils, climates, and races, as well as an intimate acquaintance with some of the less known departments of biology and zoology. These are the indispensable requirements for the student of Tropical Diseases, but most of them are relatively of minor practical importance to the ordinary medical practitioner in this Country.

The Committee believe that the institution of such an examination and diploma as that suggested by the Colonial Secretary would not only encourage the study of Tropical diseases, but would also make for the general advancement of the Science and Art of Medicine,

and stimulate the spirit of scientific enquiry among the younger members of the profession, and especially those who desire to enter the Colonial Medical Service or wish for one reason or another to practice in the tropical colonies.

The Committee would, moreover, remind the Council that, as stated in the Report of the Committee of Management, the institution of a Diploma in Tropical Medicine is already an accomplished fact in Liverpool, and that the University of Cambridge has decided to conduct examinations for a similar diploma. It would be, at least, anomalous if the chief Medical Examining Bodies in the metropolis of the Empire were definitively to decline to grant a Diploma in Tropical Medicine. Further, the Council cannot disregard the effect which such a refusal might have upon the Members of the College, and the disability from which they might suffer. It is practically certain that in the near future the Colonial Office and the great trading companies who do business in the Tropics will, in the selection of medical officers, give preference to those who possess a Diploma in Tropical Medicine. If this Diploma cannot be obtained from the two Royal Colleges in England, it is certain that it will be sought for elsewhere.

In conclusion, the Committee would suggest that if the Council determine that it is desirable to hold an examination and grant a Diploma in Tropical Medicine and Hygiene, the Royal College of Physicians should be invited to appoint representatives to form, with representatives of this College, a Conjoint Committee to take into consideration the letter of the Secretary of State for the Colonies. The Committee cannot doubt that the Royal College of Physicians will be willing to accept the invitation, for it may be noted that the rejection of the Report of the Committee of Management does not necessarily imply the rejection of the suggestion of the Colonial Secretary.

The Royal College of Physicians having consented to appoint Representatives to meet Representatives from this College, a conference was held on July 18th and the following recommendations were agreed to and subsequently adopted by the two Colleges, viz. :—

1. That with the permission of the Authorities of the School of Tropical Medicine, Visitors be appointed by the Royal Colleges of Physicians and of Surgeons to attend the Examinations of that School and to report upon the scope of the course of study and of examination, and that a request be addressed to the Naval, Military, and Colonial Authorities to allow Visitors appointed by the two Royal Colleges to attend their examinations in Tropical Medicine for a similar purpose.

2. That at the end of a year a report be addressed by these

1904.

Visitors to the Royal Colleges on the whole subject of Tropical Medicine.

3. That in the event of the Royal Colleges adopting these recommendations, a communication be sent to the Colonial Secretary informing him of these proceedings.

VIII. Central Midwives Board.

The following Report regarding the proceedings of the Central Midwives Board has been received from Mr. J. Ward Cousins, the member of the Board appointed by the Council of this College under Section 3 of the Midwives Act 1902:—

Riversdale, Kent Road,
Portsmouth,
February 2nd, 1904.

MR. PRESIDENT AND GENTLEMEN,

I have the honour to present to you a short statement of the work of the Central Midwives Board during the past year. Twenty-two meetings have been held, and also many other meetings of Committees which were duly appointed by the Board. The first meeting of the Board was held on December 11th, 1902, and the last meeting took place on January 28th, 1904.

The preliminary business consisted in framing Rules in accordance with Section 3 of the Midwives Act of 1902, and this important work occupied many meetings and caused considerable discussion. As soon as the Report of the majority of the Board was completed, it was forwarded to the Privy Council together with another Report prepared by a minority of the Board.

The present rules sanctioned by the Privy Council are the outcome of these two Reports, and they are arranged in the following sections:—(1) Rules regulating the proceedings of the Central Midwives Board. (2) The conditions of admission to the roll of midwives and the issue of certificates. (3) The course of training and the conduct of examinations. (4) The admission to the roll of Women already in practice as Midwives at the passing of the Act. (5) The supervision and restriction within due limits of the practice of Midwives. (6) The conditions under which Midwives may be suspended from practice.

The attention of the Board was next directed to the preparation of other important details:—(1) Suggestions to County and County Borough Councils in reference to the duties assigned to them under the Midwives Act. (2) Special rules of procedure for the removal of a name from the roll and the cancelling of a certificate. (3) Other rules of procedure respecting the restoration to the roll of a name previously removed.

The first roll of Midwives was opened in November 1903, and it records the names of the Midwives who have been accepted by

the Board under Section 2 of the Midwives Act. The following table indicates the number of Midwives certified up to date:—

Women holding certificates from Institutions specified in Section 2 of the Widwives Act.	{	London Obstetrical Society ...	468		
		Rotunda	27		
		Coombe.....	1		
		Queen Charlotte's Hospital ...	26		
Women holding certificates from Bodies not specified in Section 2, but approved by the Board.	{	St. Mary's Hospital, Manchester	22		
		Glasgow Maternal Hospital ...	19		
		Liverpool Lying-in Hospital ...	3		
		City of London Lying-in Hospital	1		
		Edinburgh Royal Maternity ...	1		
		Salvation Army Maternity ...	2		
		Manchester Southern and Maternity Hospital.....	—		
		British Lying-in Hospital	—		
		Women certified as having been in <i>bonâ fide</i> practice at least one year before 31st July, 1902.	{	1079
				Total certified	1649

The regulations respecting the course of training and the conduct of examinations have not yet been completed. The following Training Institutions have been already accepted by the Board under Section C of the Rules:—

Queen Charlotte's Lying-in Hospital; Liverpool Ladies' Charity and Lying-in Hospital; Manchester Southern and Maternity Hospital; British Lying-in Hospital; Newcastle-on-Tyne Lying-in Hospital; General Lying-in Hospital, Lambeth; Glasgow Maternity Hospital; Dundee Maternity Hospital; District Nursing Association, Cheltenham; Maternity Charity and District Nurses' Home, Plaistow; National Maternity Hospital, Dublin; Edinburgh Royal Maternity Hospital; City of London Lying-in Hospital.

An unforeseen difficulty has recently arisen between the Irish Training Institutions and the Central Midwives Board respecting the certificates which must be produced before a candidate can be admitted to the Board Examination. The rules under Section C make it compulsory that every woman shall have personally conducted twenty labours, and also nursed twenty lying-in women during ten days following labour.

On behalf of the Hospitals, such as the Rotunda and the Coombe, in Dublin, it is stated that the medical staff of these institutions are unable to arrange that every midwife pupil should personally attend twenty cases of labour, as this would necessitate doubling the size of the hospitals and increasing the number of patients. It is also equally impossible to enable every midwife pupil to nurse twenty patients for ten days following labour, as nearly all the women leave the hospital on the eighth day and refuse to remain longer, even when the medical officers are anxious to detain them.

Now these regulations are scarcely fair to the Irish Midwifery Institutions, and a solution of the difficulty could easily be secured (1) by a modification of the regulations of admission to the examination; or (2) by accepting the six months' training in the wards of the hospitals, and the long course of instruction conducted by the staff, as equivalent to the three months' midwifery tutelage required by the Central Midwives Board.

At a recent meeting of the Board two important and conciliatory communications were read from the Irish Hospitals, but the majority of the Board declined to consider any alteration of the existing Rules; and therefore, it is probable, the matter will be referred for the decision of the Privy Council.

The appointment throughout the country of local bodies for carrying out the Midwives Act is a very hopeful and practical method, but up to the present time very little has been reported to the Central Midwives Board to indicate the progress of the work. The supervision of Midwives is everywhere in the hands of local supervising authorities; but it is quite certain that effectual supervision and the successful operation of this Act must in a great measure depend upon the co-operation and assistance of the Medical men practising within the area.

I am, Mr. President and Gentlemen,

Yours very faithfully,

JOHN WARD COUSINS.

IX. Diploma of Spectacle Makers' Company.

The following statement was forwarded by the Council to the Worshipful Company of Spectacle Makers in reply to a communication asking for the views of the College upon a proposal to include Sight-testing in the Examination held by the Company and to extend their Diploma by certification of efficiency therein, viz. :—

“The Council of the Royal College of Surgeons have carefully considered the matters upon which they have been invited by the Worshipful Company of Spectacle Makers to express their opinion, and desire to submit the following statement of their views for the information of the Committee appointed to consider the proposed alteration in the character of the Company's Diploma.

Considering the hidden dangers and the untoward possibilities that may attend almost any morbid state of the body, it is against public safety and welfare that anyone should be deemed competent to order and prescribe any medical or surgical remedy or appliance who has not had an efficient medical and surgical training.

More especially with respect to the petition of working opticians that they should be certified, after due examination, to be qualified to test the sight and provide spectacles to correct the various errors

of refraction, it is to be observed that, while optical defects often occur in eyes which are otherwise healthy, they are not infrequently associated with diseased conditions, which are difficult to detect and whose nature and signification can only be appreciated by persons who have studied Diseases of the Eye not merely as local affections but in their relation to General Disease.

Moreover, in many grave affections of the eyes, whether of a local or of a constitutional character, such as inflammation or atrophy of the Optic Nerves, inflammation or degeneration of the Retina or Choroid, chronic Glaucoma, and many other diseases, the earliest and most obtrusive symptom is often impairment of sight, which patients themselves are too prone to ascribe to presbyopia or other optical defects remediable by spectacles. This opinion the optician, by virtue of his calling, is naturally pre-disposed to adopt or enforce.

In the ultimate interest of the Public no countenance should be given to any proposal which is likely to foster the belief that tradesmen, whatever be their technical skill, and whether opticians, or orthopædic or other surgical instrument makers, are safe and sufficient guides in the management and treatment of deformities or other diseased conditions."

X. Relations of Medical Profession to Coroner's Court.

The following Report has been submitted to the Council by the Committee appointed to inquire into the relations of the Medical Profession to the Coroner's Court, viz.:—

REPORT, dated the 5th May 1904, of the Committee on the relations of the Medical Profession to the Coroner's Court.

THE Committee, appointed by the Council on the 10th December 1903, to consider the relations of the medical profession to the Coroner's Court, have met on three occasions, viz.: on the 4th February and 3rd March 1904, and this date.

Knowing that the British Medical Association and the London County Council were considering the subject, the Committee thought it desirable to obtain information as to what had already been done by these, or any other public bodies.

They found that the Medical Society of London had formerly had the subject under consideration, but had recently taken no action.

They ascertained that the British Medical Association had for some years been in communication with the Coroners' Society with regard to the amendment of the law, and in 1902 the Association had drawn up and adopted a Bill, which was reconsidered by the newly appointed Medico-political Committee at the end of December

of that year, when communications were reopened with the Coroners' Society, with the result that that Society at the end of March, 1903, declined to co-operate on the ground that any alteration of the Coroners' law should be undertaken by the Lord Chancellor or the Home Secretary.

The Bill drawn up by the British Medical Association for the amendment of the law in relation to Coroners consists of seven clauses:—

1. Dealing with the notification of death to the coroner by the registrar where there is no medical certificate.
2. The remuneration of medical witnesses.
3. The remuneration of a medical practitioner consulted by the coroner.
4. The fee to the coroner for attendance at court.
5. With regard to the repeal of Section 22 of the Coroners Act, 1887.
6. The extent of the Act.
7. Title and construction.

Practically no material progress has been made by the Association, though the subject is still under consideration.

The Committee ascertained that the London County Council have for some years devoted a large amount of time to the consideration of Coroners' Law amendment, and the following series of recommendations were confirmed by the Council in January, 1895, and subsequently submitted to successive Lord Chancellors and Home Secretaries, but no attempt has been made by the Government to effect an amendment of the law. It has not been possible for the Council itself to introduce a Bill, as any legislation must be by a general Act applicable to the whole country.

The following are the recommendations of the London County Council, many of which appear to the Committee to be most desirable, but some of which (*e.g.* Sect. *i*) would need modification before being acceptable to the medical profession:—

- (*a*) That in no case should a death be registered without production of a certificate of the cause of death, signed by a registered medical practitioner or by a coroner after enquiry.
- (*b*) That a medical practitioner in attendance should be required, before giving a certificate of death, to personally inspect the body and identify it as the body of the person he has attended; and should include in his certificate a statement pointing to the absence of accident, poison, violence, or criminal neglect; and that the coroners be required to hear evidence from representatives of the families of the

deceased whenever it is alleged that death has been caused by accident.

- (c) That a form of certificate of death should be prescribed, and that in giving a certificate, medical practitioners should be required to use such form.
- (d) That medical practitioners should be required to send certificates of death to the registrar instead of handing them to representatives of the deceased.
- (e) That it should be made a penal offence to bury or otherwise dispose of a body without an order from the registrar stating the place and mode of disposal, which order, after it has been acted upon, should be returned to the registrar who issued it.
- (f) That it should be made an offence to retain a dead body unburied or otherwise legally disposed of beyond a period not exceeding eight days, except by permission of a magistrate.
- (g) That the certificate should be endorsed by the burial authority, with the date of interment or disposal and the place where the body is buried, and returned to the registrar by the burial authority.
- (h) That when the medical practitioner is unable to certify, he should be required to report direct to the coroner. Relations, friends, and others having cognisance of suspected cases should also be required to report them to the coroner.
- (i) That every case of death after surgical operation should be reported to the coroner with a view to preliminary inquiry and, if necessary, the holding of an inquest.
- (j) That medical investigators should be appointed,—
 1. To inquire into causes of all uncertified deaths, assisted by qualified and responsible inquiry officers.
 2. To examine the body in all such cases, and make post-mortem examination where necessary.
 3. To report the result to the coroner sitting in court, who will then decide as to necessity for holding formal inquest.
 4. To give evidence at inquest and act as medical adviser to the coroner.
- (k) That London should be divided into districts so arranged as to give approximately equal amount of work, and that coroners be paid by salary not dependent on the number of inquests held.
- (l) That franchise districts should be abolished.
- (m) That a court or courts should be provided for each district, with a coroner, clerk, inquiry officers and other necessary officials as in police courts.

- (n) That one or more medical investigators should be attached to each court, and be paid by salary.
- (o) That the office of deputy-coroner should be abolished as unnecessary in London.
- (p) That inquests should be held and evidence taken by the coroners in all cases where the reports of the medical investigators show further inquiry to be necessary, and in all cases of violent or suspicious death.
- (q) That viewing the body by a jury should no longer be obligatory.
- (r) That the number of jurymen should be reduced to one-half of the present number, *i. e.*, to not less than six or more than eleven.
- (s) That in cases involving subsequent criminal proceedings, such as murder or manslaughter, or other criminal offence, the coroner should have full power to bind over all witnesses.
- (t) That proper records of all cases dealt with by the court, whether inquests be held or not, should be kept as records of the county.
- (u) That the court should have jurisdiction in cases where the body is lying in the district to which it is attached, except in cases of accident, etc., where more than one death has taken place, when the jurisdiction shall be with the court for the district in which such accident, etc., occurred.
- (v) That coroner's juries shall be summoned by rota.

Failing any immediate prospect of legislation, the London County Council have been able to introduce certain improvements under the existing system, and have shown their willingness to consult the Medical Profession in matters more immediately concerning it by seeking the assistance of the leading Hospitals of London in the preparation of a list of skilled Pathologists who would be willing to undertake post-mortem examinations and give evidence in inquest cases of a special nature.

It will thus be seen that the Committee have been able to obtain ample proofs of the desirability of alterations in the present laws. The questions involved are, however, varied, and include matters of administration, such as the re-arrangement of coroners' districts, with which the Medical Profession is not immediately interested.

Having regard, therefore, to the various interests concerned, and to the failure of other institutions to induce the Government to initiate legislation, the Committee are of opinion that it would not be expedient for this College to take any action in the matter at the present time.

XI. Grant of Medical Certificates to Soldiers on leave of absence.

The following report regarding this matter was submitted to the Council by the Discipline Committee, viz. :—

“The Committee desire to report to the Council that they have had under consideration a communication from an Officer in command of a Battery of Royal Field Artillery at Aldershot, stating that ‘it is a notorious fact amongst soldiers that a certain class of practitioner will grant a medical certificate to enable a soldier to remain absent on insufficient grounds,’ that several instances have recently come under his notice, and that in two cases the certificate has assisted the soldier to desert and to conceal his desertion for several days.

The Officer in question also submits full particulars of one case, from which it would appear that a Driver in his Battery obtained a certificate of this nature upon insufficient grounds.

Without questioning the *bona fides* of the practitioner who granted the certificate in the particular instance to which their attention has been called, the Committee, in view of the alleged frequency of such cases, would suggest to the Council the desirability of calling attention to the abuses to which medical certificates may be put.”

In consequence of this Report from the Disciplinary Committee, the Council adopted the following resolution, viz. :—

The attention of the Council having been called to the fact that medical certificates are not infrequently made use of by soldiers to assist them in deserting and otherwise evading military discipline, the Council desire to call the attention of Fellows and Members to the abuse to which such certificates may be put and to the responsibility which is attached to their issue.

XII. Physical Disability of Recruits for the Army.

A letter, dated 1st December 1903, was received from Mr. A. W. FitzRoy, Clerk of the Privy Council, forwarding a further Memorandum from the Director-General of the Army Medical Service, together with four Tables of figures giving more detailed statistics as to the percentage of recruits rejected and the causes of rejection, and stating that the Physical Deterioration Committee “will be glad if the Royal College of Surgeons will take these documents into consideration, and, while favouring the Committee with any observations it is desired to make, will be careful to state whether the perusal of the supplementary matter now furnished suggests the

modification in any degree of the opinions previously expressed on the subject."

The following reply to this communication was addressed by the President on behalf of the Council, viz.:—

SIR,

22nd December 1903.

With reference to your letter of the 1st instant forwarding a copy of a further Memorandum prepared by the Director-General of the Army Medical Service, together with four Tables of figures giving more detailed statistics as to the percentage of rejection of those who have offered themselves as recruits, and as to the causes of the rejections, the Council of the Royal College of Surgeons beg to make the following observations:—

The Council note that the Director-General thinks "that the idea of 'progressive physical deterioration' has occupied a much too prominent position in the minds of those who have had to consider and report as to the advisability of inquiry being necessary," and they also note the statement that the intention of his original Memorandum was to call attention to "the most disturbing fact that from 40 to 60 per cent. of the men who present themselves for enlistment are found to be physically unfit for military service," and not to suggest there was evidence of a "progressive physical deterioration of the race," concerning which there are no trustworthy "statistical or other data."

With reference to these remarks of the Director-General, the Council desire to point out that in their Report to the Home Office they did not use the phrase "progressive physical deterioration," though some of their criticisms did assume that the first Memorandum of the Director-General seemed to suggest the idea of progressive physical deterioration among certain classes of the community.

While, therefore, the Council may not in every respect have interpreted quite accurately all the meaning and import of the Director-General's first Memorandum, their opinion was in no sense based upon a misunderstanding as to the main question at issue; and they are entirely in accord with the Director-General in believing that the two principal matters now to be considered are: first, an inquiry into the causes and present extent of the physical unfitness for military service that exists in a large degree among certain classes of the population; and second, the institution of measures which may bring about an improvement of the physique of the classes from which most of the recruits are at present drawn.

The Council believe that, in addition to any other means which may commend themselves to your Committee, the adoption of the precautions and supervisions indicated in the Council's previous Report would contribute not a little to the physical and moral improvement and well-being of the classes concerned.

In conclusion, the Council beg to state that, after a careful

perusal of the supplementary information now supplied, they see no ground to modify the opinions which they have previously expressed upon the subject of the Physical Disability of many of those who offer themselves as Recruits.

I am, Sir,

Your obedient Servant,

A. W. FITZROY, Esq.,
Privy Council Office.

JOHN TWEEDY,
President.

Mr. John Tweedy, President, and Sir Alfred Cooper, Vice-President, were subsequently appointed to give evidence, before the Inter-Departmental Committee on Physical Deterioration sitting at the Privy Council Office, on the condition of the eyes and on the prevalence of syphilis, respectively, among the poorer classes of the population, and a full account of their evidence is given in the published Minutes of the proceedings of that Committee.

The Inter-Departmental Committee conclude their recently published Report by saying: "They also desire to recognize their obligations to the Royal College of Surgeons and Physicians for the assistance rendered by those bodies, in expressing their opinion on points submitted to them and in the selection of witnesses."

XIII. Standard Weights of Children.

The following letter upon this subject was addressed to the College by the Rev. Benjamin Waugh, Director and Secretary of the National Society for the Prevention of Cruelty to Children, viz.:—

S. Forrest Cowell, Esq.,
Royal College of Surgeons,
Lincoln's Inn Fields, W.C.

December 16th, 1903.

DEAR SIR,

In consequence of a communication I have received from Dr. Hirsch, of Woolwich, I am taking the liberty to lay before you the following facts. This Society proceeds against parents who are guilty of neglect and starvation of children. The assertion has been largely made that the standard weights taken from Tidy's 'Legal Medicine,' 1882, is not a fair one for to-day, as the race has deteriorated both in height and weight. In order to be just to those against whom we proceed, we have had 5000 children in London weighed and measured. The tables of the average heights and weights will be ready shortly, and I am anxious as far as possible to get these standards sufficiently authoritative to justify Judges and Magistrates in using them. Recent events have made it clear that much doubt exists as to the justice of Tidy's standard. I hope I have made it clear for what purpose I trouble you and

your Royal College. We dealt with 29,320 cases of neglect and starvation last year, and therefore the matter is of great importance. This must be my apology for intruding upon your kindness and courtesy.

I am, Yours faithfully,

BENJAMIN WAUGH,
Director.

This letter, together with the tables of heights and weights referred to therein, was referred to a Committee for consideration, and the following is their Report which was adopted by the Council as their reply to Mr. Waugh, viz. :—

“In pursuance of the request of the Council the Committee have taken into consideration the letter of the 6th December, 1903, from the Rev. Benjamin Waugh, Director of the National Society for the Prevention of Cruelty to Children, and the Tables of average Heights and Weights of School-children compiled on behalf of the Society by Mr. C. T. W. Hirsch, M.R.C.S.

Two Tables have been prepared by Mr. Hirsch—one compiled from the weights of 2000 children at two Church Schools and two Board Schools in Woolwich, and the other compiled from the weights and heights of 3000 children at Church Schools in Bow, Poplar, Stepney, Peckham, Bermondsey, and Camberwell.

The ages of the children range from 2 to 16, and the Committee observe that, with three exceptions, the average weights at the different ages are rather lower in the Woolwich Table than in the other.

The investigation appears to have been carried out in a careful and methodical manner; but, while the Committee regard the results obtained as most valuable, they could not recommend that the Royal College of Surgeons should assume responsibility for statistics compiled from an investigation undertaken without the supervision or authority of the Council of the College.

The Committee have, however, been able to make use of Mr. Hirsch's Tables for the purpose of testing the assertion, which Mr. Waugh states is often made, that the standard weights given in Tidy's 'Legal Medicine,' 1882, are not a fair standard for to-day, as the race has deteriorated both in height and weight. Dr. Tidy states that his figures are reduced from the French weights and measures given in Quetelet's 'Anthropométrie' (Brussels 1870), and that they are the averages of a large number of observations on Belgians, and are probably a little under the mark as regards the English.

The Committee have compared Mr. Hirsch's Tables with the Tables given by Dr. Tidy; and after the consideration of this comparison and of other Tables, to which they have referred, they are of opinion that there is no reason to regard the standard given in Dr. Tidy's Tables as too high for the present time.

The Committee would add that Mr. Waugh might be advised that, if it be the object of the National Society for the Prevention of Cruelty to Children to show that Dr. Tidy's Tables are not an unfair test under present conditions, it appears to them that enough has been done in the way of investigation."

XIV. Proposed Anthropometric Survey of United Kingdom.

Among the matters brought under the consideration of the Physical Deterioration Committee sitting at the Privy Council Office was a Scheme for an Anthropometric Survey of the United Kingdom submitted by Professor D. J. Cunningham and Mr. J. Gray, President and Secretary of the Anthropometric Committee of the British Association.

This Scheme suggests the division of the United Kingdom into 400 districts, and that in each of these districts 80,000 adults and 800,000 school children should be measured, the latter being subdivided into 12 age groups each of one year. Forty districts per annum are to be dealt with, and the complete survey would thus occupy a period of ten years.

The Scheme provides for the formation of a National Bureau, which would involve the establishment of:—

- i. An Honorary Consultative Committee, consisting of three leading Anthropologists.
- ii. A Central Bureau, under the direction of a Director and a Deputy Director, with a statistical department.
- iii. Surveyors or Measurers.

With regard to the Surveyors or Measurers Professor Cunningham discusses two arrangements—one that School Teachers should be employed in this capacity, and the other that a special staff of permanent surveyors should be appointed. On the ground of efficiency and, as he maintains, of economy also, he recommends the latter course.

The tests and measurements which Professor Cunningham suggests should be taken in the course of the proposed Survey are the following, viz. :—

1. Height.
2. Chest girth—(a) maximum.
(b) minimum.

This gives the range of the thoracic play,
which is important.

3. Weight.
4. Head—length.

height.

5. Breadth of shoulders (callipers).
6. Breadth of hips (callipers).
7. Vision tested by Snellen's type.
" " different colours.
8. Degree of pigmentation.

Information regarding parentage, district of birth, and conditions of living, etc., should be obtained.

The Council of the College were invited by the Physical Deterioration Committee to offer any observations they might desire upon the Scheme, and especially to express an opinion as to the minimum number and kind of measurements and tests necessary to be used in order to effect the object in view.

After a careful consideration of the question, in which they had the assistance of two of the Hunterian Professors of the College—Dr. Arthur Keith, F.R.C.S., and Dr. Arthur Robinson—the Council adopted the following reply, viz.:—

“ Having regard to the fact that no trustworthy statistics or other data are available for the purpose of comparing the physical condition of the nation at the present time with that which obtained in the past, or for forming the basis of a comparison with that which may obtain in the future, the Council of the Royal College of Surgeons are of opinion that the adoption by Government of a Scheme for an anthropometric survey of the United Kingdom, such as that proposed by Professor Cunningham, is greatly to be desired.

“ The Scheme appears to the Council to be well calculated to elicit those facts, of which a knowledge is essential to the formation of any opinion as to the physical improvement or deterioration of the race, and they moreover believe that the results of the investigation would be of great scientific value and interest.

“ With regard to the measurements and tests to be used, the Council approve those recommended by Professor Cunningham. They, however, think that the value of the investigation would be increased by the addition of the measurement of the lower extremities from the crest of the ilium.”

XIX. Preparation of Antitoxic Serum.

For some years past an arrangement has been in force with the Metropolitan Asylums Board, under which the serum used for the treatment of cases of diphtheria in the Hospitals of the Board has been prepared in the Laboratories of the two Colleges.

This work was originally undertaken by the Colleges at a time when the use of antitoxin was less assured than it is at the present time, and their action has doubtless been of public benefit.

Considerable quantities of the serum are now used, and it is felt that in order to ensure a sufficiently large and constant supply, it would be necessary to increase the present stud of horses and to build suitable stables and laboratories on a large scale out of London.

There are now, however, other institutions which could undertake the work, and it is thought that the Colleges would not be justified in expending a large sum upon an object with which, now that the efficacy of antitoxin is generally recognized, they are not immediately concerned.

Notice has accordingly been given to the Metropolitan Asylums Board that the Colleges propose to terminate their agreement for the supply of the serum. It has, however, been arranged to let to the Metropolitan Asylums Board for another year the rooms at the Examination Hall at present utilized for the work of the Board.

XX. Finance.**INCOME.**

The gross Income of the College for the past year amounts to £26,969, being £547 more than the gross Income of the previous year.

As regards the fees received by this College from the Conjoint Examining Board in respect of the examinations for the L.R.C.P. and M.R.C.S., there is a decrease of £95 on the First Examination, of £78 on the Second, and of £544 on the Third, but an increase of £372 in the Diploma fees paid by University Candidates, resulting in a net decrease of £315. This decrease in the Receipts in respect of the Third Examination is chiefly due to a falling-off in the number of *original entries for the Examination, indicated by a

decrease of 124 in the number of Candidates examined in Midwifery, the part of the Examination for which Candidates usually enter in the first instance. There has also been a decrease of 90 in the number of Candidates examined in Medicine, and although there has been an increase of 124 in the number examined in Surgery, this does not compensate financially for the decrease at the other parts of the Examination. It may, however, be noted that, but for the exceptional number of rejections at the Examination in Surgery, there would have been a much larger increase than £372 in the Diploma fees paid by University Candidates.

The Incidental Receipts from the Conjoint Examining Board are £558 more than in the previous year, an increase chiefly derived from the letting of rooms in the Examination Hall and Laboratories.

There is also an increase of £73 as regards the fees for the Diploma in Public Health.

In the case of the fees paid by Candidates for the Fellowship there is an increase of £165, and a credit balance of £446 is shown on this account.

As regards the fees for the Licence in Dental Surgery, there is a slight decrease amounting to £51.

In consequence of the reduced rate of the Income Tax there is an increase of £42 in the Receipts from the Erasmus Wilson Bequest, whilst this cause and additional purchases of Stock have produced an increase of the same amount in the Receipts from the other investments of the College.

EXPENDITURE.

The Expenditure of the College for the past year amounts to £24,174, or £242 less than the Expenditure of the previous year.

The amount of the fees paid to the Examiners of the Conjoint Examining Board is £49 less and the expenses at the Examination Hall are £155 less.

The expenses of the Fellowship Examinations are rather more, and the expenses of the Examinations for the Licence in Dental Surgery rather less, than in the previous year.

The balance of this College's share of the expenses in connexion with the Research Laboratories amounting to £218 has now been paid, and this division of expenditure will not appear in the next annual statement of accounts.

With regard to the expenses of the College in Lincoln's Inn Fields, there is a decrease of £127 in the expenses included under the head of General Working Expenses, chiefly due to reduced Rates and Taxes.

The Special Expenses of the Museum are £204 less than last year, but are again rather in excess of the normal amount, the expenditure of £98 upon Furniture and Fittings being larger than usual, and a sum of £63 being included for Hunterian Lectures postponed from the previous year.

There has been no exceptional expenditure in the case of the Library, and the figures under this head show little variation.

The Extraordinary Expenditure is heavy, amounting to £1014, 1904.

the chief items being a premium of £418 on a seven years' policy of insurance against fire and £393 for redecorating Rooms II. and III. of the Museum.

GENERAL REMARKS.

The balance of Income over Expenditure amounts this year to £2794, a larger sum than any realized for some years past.

During the year the investments of the College have been increased by the purchase of £1000 Local Loans 3 per cent. Stock and £1500 London County 3 per cent. Stock.

A sum of £1612 7s. 6d. has also been expended upon the redemption of the Land Tax on portions of the College property, the Tax redeemed amounting to £53 14s. 11d. for the year ending 5th April, 1904.

XXI. Issue of Diplomas.

During the period with which this Report deals, the following Diplomas have been issued, viz.:—

Qualification.	Number of Diplomas issued.
Membership	433
Fellowship	40
Licence in Dental Surgery	137
*Diploma in Public Health	45

* Granted jointly with the Royal College of Physicians.

XXII. Fellows' Dinner.

For the first time a Fellows' Dinner has been held within the precincts of the College.

The adoption of the method of voting by Balloting Papers sent through the post gradually led to a great change in the character of the Meeting for the Annual Election of Members of the Council.

When personal attendance at the College was required, the Meeting served as an opportunity for the assembling of Fellows engaged in practice in the Metropolis or in the Provinces, and also afforded to the Fellows generally special facilities for seeing the additions to the Museum, and for observing the progressive improvements which are being constantly made.

The loss of the opportunity for meeting together, caused by the introduction of votes sent through the Post, was regarded by many as a matter for regret, and the Council decided to revive, in a somewhat altered form, the Annual Dinner of the Fellows, which had now been some years in abeyance.

A Fellows' subscription dinner was accordingly held in the Library of the College on Thursday, the 7th of July, after the election of Members of the Council. The Chair was taken by the President, Mr. John Tweedy, and 100 Fellows were present.

THE MUSEUM.

THE Hunterian Collection, which forms the basis, and still a large proportion, of the contents of the present Museum of the Royal College of Surgeons of England, was originally arranged in a building which its Founder, John Hunter, erected for it in 1784, behind his house in Leicester Square.

John Hunter died October 16th, 1793, aged 65. By his will he directed the Museum to be offered in the first instance to the British Government, on such terms as might be considered reasonable, and in case of refusal to be sold in one lot, either to some foreign state, or as his executors might think proper.

In the year 1799 Parliament voted the sum of £15,000 for the Museum, and an offer of it being made to the Corporation of Surgeons, it was accepted on the terms proposed by Government*.

In 1806 the sum of £15,000 was voted by Parliament in aid of the erection of an edifice for the display and arrangement of the Hunterian Collection; a second grant of £12,500 was subsequently voted, and upwards of £21,000 having been supplied from the funds of the College, the building was completed in Lincoln's-Inn-Fields, in which the Museum was opened for the inspection of visitors in the year 1813.

In consequence of the large number of additions, this building became too small for the adequate display and arrangement of its contents; and more space being at the same time required for the rapidly increasing Library, the greater portion of the present building was erected, wholly at the expense of the College, in 1835, at a cost of about £40,000, and the Hunterian and Collegiate Collections were re-arranged in what are now termed Rooms Nos. III. and IV., which were opened for the inspection of visitors in 1836.

Further enlargement of the building having become necessary by the continued increase of the Collection, the College, in 1847, purchased the extensive premises of

* The following are the Terms and Conditions on which the Hunterian Collection, purchased by Parliament, was delivered to the late Corporation of Surgeons; which Corporation having become dissolved, the Members thereof were re-incorporated by Charter, dated the 22nd day of March, 1800, under the Title of The Royal College of Surgeons in London:—

1st. The Collection shall be open Four Hours in the Forenoon of two days every week for Inspection and Consultation of the Fellows of the College of Physicians, the Members of the Company of Surgeons and Persons properly introduced by them; a Catalogue of the Preparations, and a proper Person to explain it, being at those times always in the Room.

† 2nd. That one Course of Lectures, not less than twenty-four in number, on Comparative Anatomy and other subjects, illustrated by the preparations, shall be given every year by some Member of the Company.

3rd. That the Preparations shall be kept in a state of Preservation, and the Collection in as perfect a state as possible, at the Expense of the Corporation of Surgeons, subject to the annual Inspection and Superintendence of the Trustees.

4th. That there shall be a Board of Trustees, to consist of sixteen (increased to seventeen by the Lords of the Treasury in 1856) Members, by virtue of their Public Offices, and of fourteen others, to be appointed, in the first instance, by the Lords of the Treasury, and afterwards to be elected, as Vacancies may happen, by a Majority of the remaining Trustees.

5th. That the Museum shall always be open for the Inspection of all or any of the said Trustees, who are to take care that the Corporation of Surgeons perform their Engagements respecting the said Collection. That a day be appointed for the annual Inspection of the Museum, by the Trustees acting collectively as a Board; and that they are also to have quarterly Meetings, for the transacting of any Business relative to the Museum, and for the filling up of such Vacancies as may happen in the number of the Trustees; and that the Corporation of Surgeons shall engage some person to officiate as Secretary to the Board upon such occasions, and to issue previous Notice to the Members, in which he is to state particularly whether any Vacancies are to be filled up by new Elections.

† This Clause was altered by permission of the Lords of the Treasury in 1894, to the following, viz.:—

2nd. That one Course of Lectures, not less than twelve in number, on Comparative Anatomy and other subjects, illustrated by preparations from the Hunterian Collection and the other contents of the Museum, shall be given every year by Fellows or Members of the College.

Mr. Alderman Copeland, in Portugal Street, for the sum of £16,000, and in 1852 proceeded to the erection of Room No. V., at the expense of £25,000, Parliament granting £15,000 in aid thereof. The rearrangement of the specimens was completed, and the additional portion of the building opened to visitors in 1855. The Collection still continuing to increase and more space having again become necessary, the College in 1888 determined to erect, at a cost of £19,000, two new Museums on the western side of the old structure. These buildings, called Rooms Nos. I. and II., were completed in 1891. Besides giving greater accommodation for the Collection in general they have also provided space for the display of photographs and drawings illustrating Diseases.

The Hunterian Collection was estimated to consist of 13,682 specimens, distributed under the following heads :—

Physiological Department, or Normal Structures.

Physiological preparations in spirit	3745
Osteological preparations	965
Dry do.	617
Zoological do.	1968
Fossils :—	
Vertebrate	1215
Invertebrate	2202
Plants	292

Pathological Department, or Abnormal Structures.

Preparations in spirit	1084
Dry preparations (including bones)	625
Calculi and concretions	536
Monsters and Malformations	218
<i>Microscopic preparations</i>	215

Of the additions by which the size and value of the Collection have been so materially increased since it came into the possession of the College, very many have been presented by Fellows and Members of the College, and other persons interested in scientific pursuits. Among the largest contributions from this source have been the Collection, consisting of 847 specimens, presented in 1811 by Sir William Blizard, and a valuable series of Pathological specimens presented in 1851 by Sir Stephen L. Hammick. At the same time the Council of the College have availed themselves of various opportunities as they have occurred to purchase specimens of interest, especially at the dispersion of private anatomical and pathological museums, as that of Sir A. Lever in 1806, of Mr. Joshua Brookes in 1828, of Mr. Heaviside in 1829, Mr. Langstaff in 1835, Mr. South in the same year, Mr. Howship and Mr. Taunton in 1841, Mr. Liston in 1842, Mr. Walker in 1843, and, deserving of especial mention on account of the great number and value of the specimens acquired, those of Sir Astley Cooper in 1843 and Dr. Barnard Davis in 1880.

The Histological Collection, of which the 215 Hunterian specimens (prepared by Hewson) constitute the nucleus, was chiefly formed by the late Professor Quekett, with considerable additions by purchase from Dr. Tweedy J. Todd, Mr. Nasmyth, and Professor Lenhossek. It now contains upwards of 12,000 specimens, all arranged and catalogued so as to be readily available for reference.

The superintendence of the Museum is confided by the Council of the College to a Committee of its Members, which Committee has held seven meetings during the past year.

A summary of the progress made in the preservation, arrangement, and augmentation of the Collection will be found in the following Report.

CONSERVATOR'S REPORT.

DEPARTMENT OF PATHOLOGY.

DESCRIPTIONS of the preparations added to the Pathological Series during the past year have been drawn up, and the 18th Appendix to the general Catalogue of the Pathological Museum has been prepared.

Amongst the many interesting additions notice may be more particularly made of:—

A series of specimens showing experimental results of castration and vasectomy in young Sheep, proving that uncomplicated vasectomy is not followed by want of development of the testis and sexual apparatus.

Specimens exhibiting the results of incomplete castration in cockerels: under these circumstances the glands are reproduced, and the birds acquire the full male characters.

A cast from the remarkable specimen of Leontiasis ossea in the Liverpool Royal Infirmary, which specimen was described by Dr. Charles Murchison in the Pathological Society's Transactions.

A specimen of hypertrophic stenosis of the pyloric canal, from a patient not subjected to operation.

Pancreatic calculi removed by operation from the pancreas, referred to by the donor, Mr. A. W. Mayo Robson, in his College Lectures.

Calculi, remarkable as having been removed by nephrolithotomy on the same patient, on whom two previously similar operations had been carried out. Kidney the same.

Angeioma of the brain.

Enlarged prostate removed during life, and a spindle-celled sarcoma of the prostate occurring in a child.

No. 4225 B. Dentigerous dermoid cyst or teratoma of the testicle; removed from a boy; one of the few recorded examples.

Portions of a vesical calculus found, with the skeleton of a boy, in the pre-historic cemetery, El Amrah, Upper Egypt. The calculus is computed to be about 7000 years old, and consists of uric acid with a thick crust of phosphates. A careful search for the ova of Bilharzia has not yet been attended with positive results.

In the Teratological Series two odontomata from the temporal bone of a horse, representing portions of a Teratoma, constitute one of the most important of the additions.

To this may be added a specimen of fusion of semilunar and cuneiform bones of both sides in a Soudanese. It is only in African races that the condition has as yet been found.

The incorporation of the chief part of the specimens illustrating Mr. L. B. Rawling's Jacksonian Essay (1902) constitutes a valuable addition to the series of Fractures of the Skull and Contusions of the Brain.

DEPARTMENT OF HUMAN AND COMPARATIVE ANATOMY.

Of the more notable additions made to this department of the Museum during the past year, may be mentioned:—Thirteen consecutive cast exuviae of a Crab (*Carcinus maenas*), the series being terminated by the body of the crab. They show that the rate of exuviation and the rapidity of growth decreases with age. These specimens were presented by Mr. H. J. Waddington, by whom the animal had been kept under observation and fed daily.—Seven examples of the female genitalia of various Marsupials, presented by Mr. J. P. Hill of Sydney.—A preparation of the trachea and the root of the lungs of a Hamadryad Snake (*Ophiophagus bungarus*), showing a series of chambers that communicate with the cavity of the trachea by means of openings in its dorsal wall: obtained from the Zoological Society.—The hinder extremity of the brains of two Egyptians, each with a definite Simian sulcus; also a thin section through a similar specimen stained with osmic acid to show the definite layer formed by the fibres of the optic tract in the cortex, and its abrupt termination on the dorsal surface at the posterior lip of the Simian sulcus: presented by Prof. G. Elliot Smith.—Preparations of the muscular sac concerned in the protrusion of the eyes in Flat-Fishes.

The Leathery Turtle (*Dermochelys coriacea*), recently purchased, is yielding many interesting specimens, that are of special interest, as the visceral anatomy of this rare animal is still very imperfectly known.

Among the additions to the Osteological Series attention may be called to:—The skulls of two species of Wombat (*Phascolomys mitchelli* and *P. ursinus*), the latter is a very fine specimen of a form now probably extinct. For these the College is indebted to Mr. H. H. Scott of Tasmania.—A skull and twelve crania of Filipinos, presented by Staff-Surgeon C. Marsh Beadnell, R.N.

Rooms II. and III. were repainted last year, the work being carried out in a thoroughly satisfactory manner, without injury to the specimens. This year it is proposed similarly to redecorate Rooms I. and IV.

THE LIBRARY.

THE Library of the College dates from the year 1800, in July of which year the first grant of a sum not exceeding £50 was made for Library purposes. It had been the intention of the old Corporation of Surgeons to form a Library, but they failed to carry their intention into effect. In its early years the Library was considerably increased by presentations and bequests of books—the principal donors being Dr. Baillie, Sir Everard Home, Sir Charles Blicke, the widow of Mr. Sharp, Sir Ludford Harvey, Dr. Fleming, Mr. Cotton, and Mr. Long. The Court of Assistants also directed from time to time the expenditure of small sums of money for the purchase of books. Sir Charles Blicke, in the year 1816, invested the sum of £300, the proceeds of which were to be devoted to the same object. By these means extensive purchases were from time to time made from the libraries of Mr. Pitt, Mr. St. André, Sir Anthony Carlisle, and others. The progress of the Library, however, for the first twenty-six years of its existence was very slow, but in 1827 great efforts were made to put it in a thoroughly good condition; in that and the two subsequent years the sum of £5269 was spent in the purchase of books, and in 1829 the first Librarian was appointed. The College was practically rebuilt by Sir Charles Barry in 1835–36, and during that period the Library was closed, the books being packed in cases and stored in the Museum Gallery. On the 15th of February, 1837, the Library was re-opened, the rooms in the new building allotted to this department being the Reading-Room and the Librarian's Room. From this date until 1888 very little extra accommodation had been provided for the Library, a small Committee-Room had been fitted up with shelves and room made for a few books under the Theatre.

The munificent gift of Sir Erasmus Wilson enabled the Council in 1888 very materially to increase the Library accommodation, and at the same time to improve and re-decorate the existing building. The residence of the Conservator of the Museum at the east end of the College was pulled down, and the building erected on its site was devoted to Library purposes. On a level with the old Reading-Room an extension was built, the two rooms being connected by four archways, two on the ground and two in the Gallery. Beneath this a handsome Book-Room was provided, and below that a spacious Store-Room. The new building, as at present shelved, gives accommodation for 26,000 volumes. The Librarian's Room was considerably improved by throwing into it a loft above the old ceiling and a passage which led into the Reading-Room.

The whole of the Library premises were re-decorated, and the Electric Light was installed throughout. The heating apparatus, which was under the floor at the south side of the Library, was all removed, and in its place a coil of hot-water pipes was placed in each window. The gallery railing, being in an unsafe condition, was replaced by one of a stronger pattern.

This extension of the Library made it possible to re-arrange the books in such a way as to make them more accessible to readers. In the Gallery of the Extension stand the books on Anatomy, Physiology, Pathology, Medicine and Surgery; round the Reading-Room are ranged sets of the Periodicals and Transactions in greatest demand. There is also a good collection of dictionaries, encyclopædias, systems and general books of reference, conveniently arranged for the use of readers.

The lower room contains books on Chemistry and Physics, Materia Medica and Therapeutics, Forensic Medicine, Diseases of Women and Children, History of Medicine and Surgery, Biography and Bibliography. The basement is devoted to

old sets of Journals and Transactions, a collection of Theses, and to miscellaneous books.

The Librarian's Room contains the books on Biology, and certain valuable works which are kept in glass cases.

The current numbers of the Journals are displayed on tables down the middle of the Reading-Room: four of these are fitted with sliding trays, in which books too large for the wall-cases, and illustrated works still in progress, are kept. The new books are placed on a stand in the centre of the Room; these are catalogued directly they are received, and are at once available for readers. A list of the additions is posted in the Library.

The first Catalogue of the Library was issued in 1831. A classed Catalogue was prepared by Dr. Willis, and was in use in MS. for some years; in 1838 a synopsis of it was printed, and the work itself was published in 1843. In 1853 an index of subjects was issued, and four supplements to the Author Catalogue were published between the years 1840 and 1860. In 1890 a List of Transactions, Periodicals, and Memoirs in the Library was published. A new Catalogue of Authors and Subjects is now being prepared on cards; these are kept in two cabinets at the west end of the Reading-Room, and are available for use by the readers. When the work is finished the cards can be used as copy for the printers.

The Library is particularly rich in the Transactions of Societies, and in Periodicals relating not only to Medicine and Surgery, but also to the accessory sciences. The large illustrated works on Zoology, Anatomy, &c., are also well represented. There is a good collection of Portraits of Members of the Medical Profession.

In December 1892 a Common Room for the use of Fellows and Members was opened in the Reading Room adjoining the Hall.

A new Store Room for books was fitted up on the basement in 1901.

The Donations to the Library during the past year include Volumes 2, 4, and 5 of "Memoirs from the Biological Laboratory" of the Johns Hopkins University; a valuable collection, made by himself, of portraits of Honorary Fellows of the College with autograph letters, from Mr. Reginald Harrison; a photograph of the Presidential Badge, presented by him to the College, from the President; two copies of his "Kraniologischer Beweis für die Stellung des Menschen in der Natur" from Mr. N. C. Macnamara; an autograph letter from Sir Astley Cooper to Thomas Egerton Bryant and a bond signed by the latter, promising to pay the College £10 in case he should at any time practise Surgery within seven miles of the City, from Mr. Thomas Bryant; and a "Series of Papers by or concerning Raymond John Horton Smith" from Mr. Richard Horton Smith, K.C.

The Library being intended for purposes of Reference, *the removal of any book from the Reading-Room by Readers is strictly forbidden.*

Readers are permitted to take books from the shelves for use in the Reading-Room ; but they are particularly requested not to return the books to their places, but to leave them on the Table.

Members of the College have the privilege of personally introducing a Visitor.

Persons, not Members, desirous of Admission must make application in writing to the Librarian, specifying their Christian and Surnames, Rank or Profession, and Residence ; which application must be accompanied by a letter from a Fellow or Member, recommending that a Ticket may be granted to the Applicant. Tickets of Admission, which are not transferable, are granted for six months, at the expiration of which time application must be made for their renewal.

In the case of Students the application must be made on a form which may be obtained from the Librarian. Tickets are granted to Students on the sole condition that the Library is used by them for such purposes of study as they may be unable to pursue without the aid of books not accessible elsewhere. These tickets are granted for three months, at the expiration of which time application must be made for their renewal if the holder wishes to retain the privilege of reading in the Library.

The Catalogue in course of preparation is in a Cabinet at the west end of the room. Readers are requested to make personal application to the Librarian for any book they do not find in the Catalogue, as it must of necessity be incomplete for some time.

Readers, taking extracts from any book, may not lay the paper on which they write on any part of such book ; nor may any tracings be taken from any plate without the permission of the Librarian.

Books belonging to the College are not to be written upon ; and any one observing a defect in a book, is requested to report the same to the Librarian.

Readers desirous of consulting works not in the Library are requested to enter their wants in a book provided for that purpose, in order that the same may be reported to the Committee.

Every person before admission to the Library is required to insert his name and residence in a book provided for that purpose.

Walker Prize.

1. The Walker Prize shall be awarded for the best work in advancing the knowledge of the Pathology and Therapeutics of Cancer done, either partially or wholly, within the five years preceding the year in which the Prize shall be awarded.

2. The next award of the Prize shall be for the five years ending the 31st December, 1905.

3. The Prize shall consist of a gift of £100. A document declaratory of the award, sealed with the College Seal and signed by the President, shall be presented with the Prize.

4. The Prize shall be awarded by the Council on the recommendation of a Committee at the Quarterly Meeting of the Council in the April following the expiration of the quinquennial period. The Council shall not, however, award the Prize should they not consider any work deserving of it.

5. The Committee shall consist of five Members and shall be appointed by the Council not less than one year prior to the date of the award of the Prize. The Committee shall not of necessity be confined to Members of the Council.

6. The grounds upon which the Prize is awarded shall be made public at the time of the award.

7. The Prize shall be open to foreigners as well as to British subjects, and the Committee shall not be restricted in any way as to the selection of persons qualified to receive the Prize, with the exception that Members of the Council shall not be eligible.

NOTE.—It is not intended that Essays should be submitted in competition for this Prize, or that those who are anxious to obtain it should be called upon to submit their names as Candidates. It is hoped, however, that the knowledge of the reward which may be obtained, and the distinction which it will confer on its recipient, will prove an incentive to those who are occupied in the study of this disease.

John Tomes Prize.

1. The John Tomes Prize shall be awarded triennially.

2. The Prize shall consist of the amount of the interest accruing from the John Tomes Fund during the triennial period (about £27). A document, declaratory of the award, sealed with the College Seal, and signed by the President, shall be presented with the Prize.

4. The Prize shall be awarded for original or other scientific work, done either partially or wholly within the triennial period, on the subjects of Dental Surgery and Pathology, Dental Anatomy and Physiology (including Histology), or Dental Mechanics.

5. The Prize shall be awarded by the Council on the recommendation of a Committee at the Quarterly Meeting of the Council in the April following the expiration of the triennial period. The Council shall, however, withhold the Prize if, in the opinion of the Committee, no work within the prescribed time be of sufficient merit to justify its award, and in such case shall either invest the dividends to augment the capital of the Fund, or adjudge the Prize to the author of some original research, deserving recognition, in other than dental subjects, which may have been carried out by any person eligible for the Prize.

6. The Committee shall consist of five members, and shall be appointed by the Council not less than one year prior to the date of the award of the Prize. The Committee shall not of necessity be confined to Members of the Council.

7. No essays shall be submitted in competition for the Prize in the case of the fourth award, which shall be for the period ending the 31st December, 1905; but it shall be open to the Committee to recommend to the Council that essays should be called for before any subsequent award.

2. The Prize consists of a Medal executed in bronze and an honorarium of £50.
